

NES Optometry Conference

***Sunday 22 November 2009
Radisson Hotel, Glasgow***

NHS Education for Scotland (NES) is the body responsible for organising optometric education in Scotland and we have run a number of successful courses over the past 6 months organised through SCO, Replay and specifically the Independent Prescribing Course by Glasgow Caledonian University.

NES is running its **first Scottish Conference** and we want to invite as many of the optometrists and dispensing opticians to attend what will be an exciting and instructive afternoon - as well as a good lunch.

Draft programme:

12.30 Lunch

13.30 Welcome and introduction
Representative from Scottish Government Health Directorate

14.00 Interactive session using voting handsets:

- 1. Would you refer this patient? A series of clinical scenarios*
- 2. What is this patient suffering from? A series of clinical puzzles*
- 3. Is this a Primary or Supplementary Exam - The new GOS Regulations discussed and clarified*

16.00 Plans for 2010

This event will be a significant contributor towards you understanding how to implement the new GOS regulations and we would encourage all practice managers and clinicians to attend so that we all share information and understanding with one another.

In order to qualify for CET points (and have lunch!) you must follow the link below and register **even if you have already registered for OS/SCO event in the morning.**

Deadline for registration: Friday 6 November 2009
